

Decor EDGE

EDGE FINISHING SYSTEM

- 72 93 04 EDGE FINISHING TOOL DECOREEDGE
- 72 93 01 EDGE MILLING TOOL DECOREEDGE

DecorEDGE

The **DecorEdge system** is an alternative tool to give a modern look and a fresh finishing to your prints, pictures and posters mounted on MDF or Acrylic boards.

The **DecorEdge applies a thin foil of thermal tape**, which melts with heat on the edge of the previously mounted or laminated artwork.

Use the **Edge Milling Tool** to smoothen and bevel the four edges of the board, as a first step before applying the thermal foil.

Features:

- The artwork can be finished with straight or beveled edges.
- The two processes can be done in one single pass.
- Transfer tapes are available in nine different colors, including two wood textures plus silver and gold.
- Display system to control and regulate the working temperature.
- Pilot light to indicate when the machine is ready to work.
- Minimum waste of the transfer tape.

72 93 04 EDGE DECOR TOOL

Technical information

Voltage	220 / 230 V
Hz	50 Hz / 1 phase
Advance speed	4 m / min
Temperature (°C)	From 220° to 230° C
Thickness of the tape	25 mm
Maximum Thickness of the board	22 mm
Gross weight	105 Kg
Machine sizes	81 x 58 x 116 cm
Substrates	MDF, PVC, Acrylic

Accessories

12 90 01	Transfer tape White, 25 mm x 305 m
12 90 03	Transfer tape Black, 25 mm x 305 m
12 90 04	Transfer tape Silver, 25 mm x 305 m
12 90 05	Transfer tape Gold, 25 mm x 305 m
12 90 06	Transfer tape Walnut, 25 mm x 305 m
12 90 07	Transfer tape Wenge, 25 mm x 305 m
12 90 09	Transfer tape Green, 25 mm x 305 m
12 90 10	Transfer tape Blue, 25 mm x 305 m
12 90 11	Transfer tape Yellow, 25 mm x 305 m

72 93 01 EDGE MILLING TOOL

Technical information

Voltage	220 / 230 V
Hz	50 Hz / 1 phase
Power	2 x 400 W
Maximum Thickness of the board	35 mm
Maximum Thickness of the chamfer	5 mm
Maximum polishing thickness	22 mm
Machine sizes	80 x 56 x 54 cm
Gross weight	28 Kg
Dust Collector	(Included)
Vacuum power	1500 W
Maximum air flow	56 l/s
Capacity	30 l
